

MLS EXPORT ORDER

PLEASE READ THIS BEFORE YOU START:

We offer a free service to setup your MLS export. If you will send your MLS website link, username, and password, we will setup your Genie export, test it thoroughly, and then contact you for a demo which takes approximately one hour. Please send this information to mls@appraisergenie.com. If your MLS does not allow you to share your login information, you can set up your own custom export. Please read the following information below:

You will need to include the header/labels and select which method of export (tab(.txt or .tsv), comma(.csv), or pipe(.txt)).

These are the only export types that Genie supports. If your MLS exports in a different format than the ones provide above, contact our MLS team at mls@appraisergenie.com and we will take care of adding your specific export type to Genie for future users. **The fields that are underlined below are mandatory and the Genie must have these fields at minimum to work.** If you

have multiple fields for one field (i.e. A/C – Central, Window, Evap) include all of the fields and Genie will automatically scrub the fields to make sure they are UAD compliant. You can simply send an “All fields” export if your MLS provides that option as well. Once completed, please send a sample residential export to mls@appraisergenie.com so we can ensure it is Genie compatible. If any adjustments are necessary, our MLS team will contact you.

WARNING: If you get an error message the first time you import your MLS data, it is due to the formatting of your MLS. Please send a copy of your MLS export to mls@appraisergenie.com and we will format Genie to accept your MLS export usually within 72 hours or less. We now receive automatic notification if you receive an error and will contact you via email once our development team has formatted your export.

Listing Status = Sold, Active, Pending, etc.

Zip Code
